FOLEY GARDENS

FREEPORT, ILLINOIS

Cordial Greetings To Our Friends Everywhere.

This year we are happy to be celebrating over 20 years of growing Gladiolus and our 10th year of issuing a retail catalog.

Our first interest in glads developed from a few bulbs given to us by a friend. We enjoyed the blooms so much that the following year we grew over 30 different varieties, about 400 bulbs in all. First thing we knew the glads took over the vegetable garden or at least moved it out of our back yard.

Year after year we grew more and more glads, won many ribbons at shows and generously gave flowers and bulbs to anyone interested in gladiolus. The bulbs we harvested always looked nice because even in our early years we were as much interested in growing and harvesting good bulbs as we were in having prize winning blooms to cut.

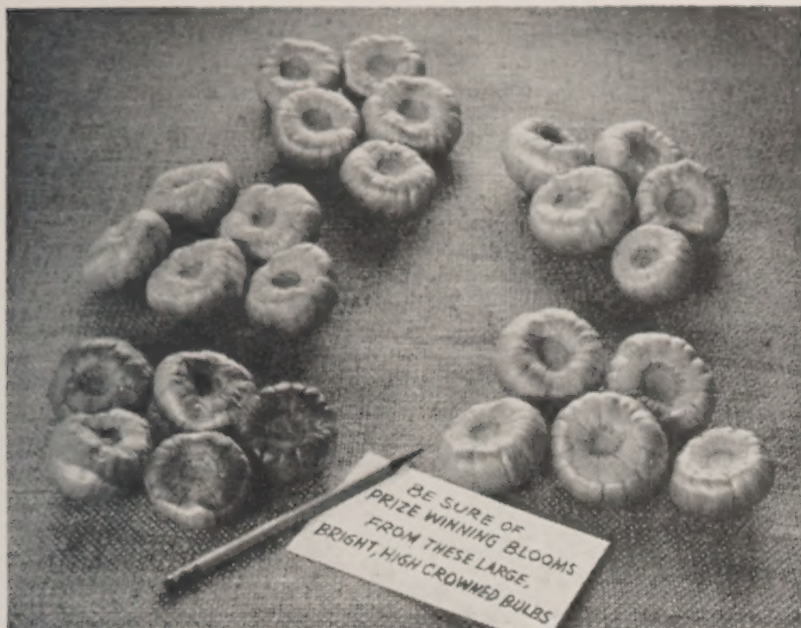

The latter part of our 1953 growing season was hot and dry, not so good for flowers but certainly perfect for bulbs. Hot days and nights with artificial watering as needed resulted in remarkable bulb growth and we harvested a large crop of as near perfect bulbs as we have ever grown. Reports from many sections of the country indicate large bulbs to be scarce. We are indeed thankful for our good crop of jumbo and large, clean, healthy and bright looking bulbs—the solid, plump, high crowned kind we have for filling all your orders this year.

Among our thousands of customers are many who will remember our first Catalog, really not a Catalog at all, just a small 4 page leaflet. Since then we have shipped millions of bulbs to customers here and abroad. It has always been our policy, when filling orders, to include many extra bulbs for trial. This year, in celebrating the beginning of our business, we will go “all out” to please you with free bulbs when your order is filled.

We fully realize our responsibility of serving you in every helpful way and our wish to everyone is that you may enjoy the blessing of good health, the relaxation, contentment and happiness that goes with working in your yard and garden, this year and throughout years to come.

Cordially and sincerely,

FOLEY GARDENS

Bulbs having a retail value of from 15 to 50c each will be used in our 10th Anniversary Collection. You are sure to have magnificent, prize winning spikes from the large and jumbo bulbs pictured above, each will measure from 1½ to 2 inches or more across.

It is indeed a pleasure to offer you this sensational collection for only **\$2.00** and to unconditionally guarantee that every bulb will grow and produce a beautiful spike of bloom.

You can enjoy that grand 'n' glorious feeling of growing glads at their best. These 25 varieties are famous here and abroad, treasured the world over for their beauty and stellar growing qualities.

Each variety has been carefully chosen from many new varieties, field-grown, tested and checked for 3 years or longer. None were "babied" or "pampered". Only those performing to our complete satisfaction, those with consistent records of magnificent spikes of sparkling beauty were chosen for this most outstanding bulb offer we have ever made.

Here is a retail value of at least **\$3.50** to **\$4.00**, priced so low that no one need deny themselves the joy and satisfaction of having the most beautiful glads you have ever grown. There will be no two alike and as each variety is listed and accurately described in our catalog, I am sure you can identify each one when it blooms by simply referring to the catalog description of newer and more expensive varieties.

WE GUARANTEE COMPLETE SATISFACTION OR YOUR MONEY BACK. All bulbs and plants are guaranteed to be true to name and free of injurious insects and disease. If you have a complaint of any kind at any time PLEASE TELL US, so that we can make an adjustment or correction satisfactory to you.

ORDERING

PLEASE SEND YOUR ORDER AS EARLY AS POSSIBLE. Use the convenient order blank enclosed. All orders will be acknowledged when received.

BECAUSE OF A RECENT 30 TO 35 PER CENT INCREASE IN POSTAGE RATES WE CANNOT ACCEPT ORDERS FOR LESS THAN \$2.00 UNLESS YOU INCLUDE 25c EXTRA TO COVER SPECIAL HANDLING AND EXTRA POSTAGE.

YOU MAY ORDER 3 BULBS AT THE 10 RATE, but no single item for less than the smallest unit listed. In other words if a variety is listed at 2 bulbs for twenty cents, we cannot sell one bulb for ten cents, as the packing costs and extra work involved will be too expensive.

FREE BULBS

This year we are celebrating over 20 years of growing gladiolus and our 10th year of issuing a retail catalog. We are thankful for a large and wonderful crop of bulbs and know of no better way to say "thank you" for your many splendid orders of previous years than to be more generous than ever with free bulbs this year.

You are cordially invited to share in our success. Yes, the treats are on us, so send in your order promptly. We know you will be happily surprised when your shipment arrives and you find out how generous we have been. It will help us to please you if you will mention varieties you would like to try.

SHIPPING

ALL RETAIL ORDERS ARE SHIPPED BY PARCEL POST. WE PAY THE POSTAGE. Your permission to ship as early as possible will be greatly appreciated. However if you specify a definite shipping date we will be guided by your wishes and instructions.

SPECIAL NOTICE

If you wish bulbs shipped during June or July, we will be glad to accommodate you providing you will place your order during MARCH, APRIL or EARLY MAY. The earlier the better. Then while our stocks are complete we can select your bulbs and keep them in storage until time to ship. All such orders should be accompanied with at least a 25% down payment.

SELECTING VARIETIES

Many times we are asked, "What varieties should I buy?" or "which ones would we recommend?" Such questions are difficult to answer, because what would please me you may not like at all. A lot depends on colors you prefer and for what purpose you want the blooms. REMEMBER that if we did not think a variety was worthwhile it certainly would not be listed.

It has always been our policy to be honest, fair and as accurate as possible in describing each variety. On this basis you can make your selections with full confidence, that those you choose will perform excellently if you will give them reasonable care and attention.

Each year we find it necessary to make some changes in varieties. It is impossible to list them all or grow them all. If a new or old variety will not perform satisfactory for us from one year to the next, we think it would be most unfair and unethical to sell bulbs of such varieties to you.

Some of the new glads in our 1953 trial garden were sensational, other very disappointing. The terrific and prolonged heat was hard on all of them. One thing can be said in favor of our hot summer, "it quickly sorted the wheat from the chaff." New glads appear in our Catalog after we feel they have made the grade. We are proud to include a larger number of newer varieties this year. Order them with confidence, then give them half a chance and they will thrill you with their size and amazing beauty.

To grow bulbs that will produce the kind of spikes and blooms you want we use the most up-to-date methods, modern machinery and follow carefully, successful cultural directions. Our bulb fields are well tended, cultivated regularly and kept free of weeds and harmful insects. This involves a tremendous amount of work and supervision, but strong, vigorous growing plants which will produce good healthy bulbs are of first importance to us, and EVEN MORE IMPORTANT TO YOU.

We cannot profitably grow either new or old varieties, which will not consistently give a high percentage of fancy marketable spikes and the choice, strong and healthy bulb we must have for filling your orders.

SIZE OF BULBS

Bulbs are graded into six different sizes, ranging from No. 1 the largest, to No. 6, the smallest. The No. 1 size is 1½ inches or more in diameter, No. 2 for 1¼ to 1½ inches. Sizes 3, 4, and 5 vary ¼ inch down to size 6, which is ½ inch or smaller.

In the retail list you will notice we list large, medium and small. Sizes 1 and 2 are

large, 3 and 4 medium and 5 and 6 small. You will always get the largest bulbs we have of the size you order. If you order large size and we are out of the No. 1 size, then all we can do is use the No. 2 size. But when this is done you will get extra bulbs to make up for the smaller size.

Remember we use only good, healthy young bulbs in filling all orders. From these you can depend upon having those big, husky spikes you will be proud to display and exhibit to your friends and garden visitors.

You can count on large bulbs to produce the largest blooms and spikes. Medium sized bulbs will nearly always bloom, though somewhat later and often with less buds on the spike. Small bulbs of most varieties will bloom but the spikes and flower heads will be shorter.

Fancy Leaved Caladium

For a continuous foliage display from late spring to frost, no other plant equals these. They are easy to grow, thrive in partial, almost full shade. In the fall before freezing weather, dig and store them like Cannas. Or you can pot them for winter blooms indoors. Start them inside in February, March or April. Enjoy the rich color combination indoors until time to plant them out. Our large 1½ to 2½ bulbs represent a mixture of many different colors. Large bulbs do much better than smaller sizes. **Each, 45c or 3 for \$1.15.**

Acidanthera

MURIELAE

(Sweet Scented Gladiolus)

A vigorous growing gladiolus-like bulb which produces highly scented flowers in late summer. The blooms have a delightful and soft fragrance. A few spikes indoors will make themselves pleasantly known throughout the room.

The flowers are white with sparkling and clear purple markings in centers. Stems grow about 2 to 2½ feet tall. In mild climates bulbs may be left in the ground over winter but in colder regions they should be dug and handled like gladiolus bulbs.

Top sized bulbs. 2 for 35c, 12 for \$1.50.

HARDY GARDEN LILIES

Of all flowers, none is more beautiful than the Lily. Nor is any more famous in song or art than those lilies, long sanctified because of their gracefulness and exotic fragrance. You have glorious opportunities to enjoy the most interesting and beautiful varieties, planted either singly, or in groups.

Each lily has its individual character and flower shape, giving the plant and flowers a stately perfection of elegant beauty. We wish there was some better way than by the use of words and pictures to describe them. All are so beautiful, one could pick at random and draw a prize.

Lilies may be planted either in spring or fall. Bulbs of some varieties arrive so late that fall planting is impractical. These kinds can be successfully planted in early spring, through May, or during early June.

WE PREFER NOT TO SHIP LILIES FOR SPRING PLANTING AFTER MAY 25th. All bulbs are carefully packed in peat moss.

If you will carefully follow the simple planting and cultural directions we send free with each order, you can glorify your garden with Lilies that will become more graceful and beautiful year after year.

Lilium Auratum (Gold Band Lily) A native of Japan. The beauty and fragrance of the Gold Band Lily is known to lily lovers the world over. Nothing in your garden will thrill you quite so much as the true beauty of this lily. The flowers are huge ivory white in color with chocolate crimson spots and a bright gold band through the center of each petal. **Large Bulbs. Each 50c; 3 for \$1.35; 12 for \$5.00.**

Lilium Candidum (Madonna Lily) One of the oldest, loveliest and best known lilies. A favorite for its beauty and delightful fragrance. The flowers are snow-white, with heavy yellow stamens. From 3 to 20 flowers on a stem depending on size of bulb planted. Grows 3 to 4 feet tall. The bulb is hardy and needs little if any protection even in cold climates. Does best in full sun. Cover crown about 3 to 4 inches. **Large bulbs. Each 45c; 3 for \$1.25. 12 for \$4.50. SHIPPED ONLY DURING LATE AUGUST AND EARLY SEPTEMBER.**

Lilium Elegans (Cottage Lily) Blooms in June and sometimes as late as July. The blooms are large and deep mahogany crimson in color. The plant grows to a height of from 1 to 2 feet. This lily does well in a sunny or partly shaded location. **Large bulbs. Each, 40c; 3 for \$1.10; 12 for \$4.00.**

Lilium Speciosum (Rubrum)

Lilium Maxwill (Maxwill Lily) A brilliant bright orange red, with black spots, with as many as 25 to 40 blooms, on stems ranging from 4 to 6 feet in height. Blooms in July and this variety is adaptable to almost any soil condition. **Large bulbs. Each 40c; 3 for \$1.00; 12 for \$3.50.**

Lilium Pardalinum Giganteum (Sunset Lily) This lily under favorable conditions grows to an astonishing height of 5 to 7 feet. The blooms are large and of a crimson color, shaded to deep cream in the throat. The deep purple spots add to its beauty and attractiveness. The clumps should be divided every two to three years. Usually blooms in July. **Large bulbs. Each, 50c; 3 for \$1.35; 12 for \$4.75.**

"The Lily bulbs were grand. The blooms of all were beautiful. I took the Auratum (Gold Band) Lily to the fair for the flower display. It won the blue ribbon. I gave your address to many people. Be sure to send them Catalogs when they write." R. Anderson, Indiana.

Lilium Regalianum (Regal Lily) A wonderfully fragrant lily with large white blooms flushed a deep purple rose. The flowers are trumpet shaped and the plants grow from 3 to 5 feet tall. This variety blooms in June and July. Bulbs should be planted to a depth of 7 to 8 inches and drainage should be good. **Large bulbs. Each 40c; 3 for \$1.00; 12 for \$3.00.**

Lilium Speciosum (Rubrum) One of the most beautiful of all lilies. The blooms are large and recurved. The colors vary from a rose pink to a carmine pink with crimson spots. Plants grow from 3 to 5 feet tall and prefer partial shade and good drainage. Large bulbs. Each, 45c; 3 for \$1.15; 12 for \$4.00

Lilium Tenuifolium (Coral Lily) Here is a lily that thrives in full sun and may be grown in any climate, except the desert. The medium sized blooms are a waxy, deep coral-red. Giant Camellia Flowering Begonias

No other flower can equal the Tuberous Begonias for sheer, exquisite beauty. When you see the beautiful flowers, you will wish you had ordered more.

Tuberous Begonias are widely used as pot plants for winter bloom indoors. They are ideal for shady places outdoors and for northern exposures. A bed of them will provide a continuous supply of flowers from early summer until frost. The flowers are perfect for bowl or saucer arrangements for all types of parties and are ideal for corsages.

The giant Camellia type Begonias are by far the most popular. The plants grow strong and the large double flowers are supported on erect stems. The foliage is wax-like and luxuriant. The plants are not difficult to grow.

With each order we send complete growing instructions. The bulbs we offer are imported from Belgium and are from 1½ to 2 inches across. Smaller bulbs can be sold for less but do not grow easily and often result in a complete failure.

Large 1½ to 2 inch tubers.

Red, Salmon, Rose, White, Yellow, Copper, Crimson, Orange. 1 for 30c, 6 for \$1.35, 12 for \$2.35, 25 for \$4.25.
